As at June 30, 2023, and December 31, 2022, the REIT had its portfolio appraised by Morguard's appraisal division. In addition, the REIT's U.S. portfolio is appraised by independent U.S. real estate appraisal firms on a three-year cycle.

The REIT utilizes the direct capitalization income method to appraise its portfolio. This method requires that rental income from current leases and key assumptions about rental income, vacancies and inflation rates, among other factors, are used to determine a one-year stabilized net operating income forecast for each individual property within the REIT's portfolio and also considers any capital expenditures anticipated within the year. A capitalization rate was also determined for each property based on market information related to the external sale of similar properties within a similar location. These factors were used to determine the fair value of income producing properties at each reporting period.

As at June 30, 2023, using the direct capitalization income approach, the properties were valued using capitalization rates in the range of 3.8% to 6.0% (December 31, 2022 - 3.8% to 6.0%), resulting in an overall weighted average capitalization rate of 4.5% (December 31, 2022 - 4.4%).

The average capitalization rates by location are set out in the following table:

Fair values are most sensitive to changes in capitalization rates and stabilized net operating income. Generally, an increase in stabilized net operating income will result in an increase in the fair value of the real estate properties, and an increase in capitalization rates will result in a decrease in the fair value of the properties. The capitalization rate magnifies the effect of a change in stabilized net operating income, with a lower capitalization rate resulting in a greater impact on the fair value of the property than a higher capitalization rate. If the weighted average stabilized capitalization rate were to increase or decrease by 25 basis points (assuming no change to stabilized net operating income), the value of the real estate properties as at June 30, 2023 would decrease by \$208,733 or increase by \$233,692, respectively.

### **NOTE 19**

#### FINANCIAL INSTRUMENTS AND RISK MANAGEMENT

Refer to the REIT's audited consolidated financial statements as at and for the year ended December 31, 2022 for an explanation of the REIT's risk management policy as it relates to financial instruments.

### Fair Value of Financial Assets and Liabilities

The fair values of cash, restricted cash, amounts receivable, the Morguard Facility and accounts payable and accrued liabilities approximate their carrying values due to the short-term maturity of these instruments.

Mortgages payable, lease liabilities and the convertible debentures are carried at amortized cost using the effective interest method of amortization. The estimated fair values of long-term borrowings have been determined based on market information, where available, or by discounting future payments of interest and principal at estimated interest rates expected to be available to the REIT.

The fair value of the mortgages payable has been determined by discounting the cash flows of these financial obligations using June 30, 2023 market rates for debts of similar terms (Level 2). Based on these assumptions, as at June 30, 2023, the fair value of the mortgages payable before deferred financing costs and mark-to-market adjustment is estimated at \$1,402,325 (December 31, 2022 - \$1,291,966). The fair value of the mortgages payable varies from the carrying value due to fluctuations in market interest rates since their issue.

The fair value of the convertible debentures is based on their market trading price (Level 1). As at June 30, 2023, the fair value of the convertible debentures before deferred financing costs has been estimated at \$54,874 (December 31, 2022 - \$85,081), compared with the carrying value of \$51,582 (December 31, 2022 - \$85,223).

The fair value of the Class B LP Units is equal to the market trading price of the Units.

The REIT's convertible debentures have no restrictive covenants.

The fair value hierarchy of real estate properties and financial instruments measured at fair value on the consolidated balance sheets is as follows:

|                                                 | June 30, 2023 |         |             | December 31, 2022 |         |             |

### NOTE 20

#### **SEGMENTED INFORMATION**

All of the REIT's assets and liabilities are in, and their revenue is derived from, the Canadian and U.S. multi-suite residential real estate segments. The Canadian properties are located in the provinces of Alberta and Ontario, and the U.S. properties are located in the states of Colorado, Texas, Louisiana, Illinois, Georgia, Florida, North Carolina, Virginia and Maryland. No single tenant accounts for 10% or more of the REIT's total revenue. The REIT is separated into two reportable segments: Canada and the United States. The REIT has applied judgment by aggregating its operating segments according to the nature of the property operations. Such judgment considers the nature of operations, types of customers and an expectation that operating segments within a reportable segment have similar long-term economic characteristics.

Additional information with respect to each reportable segment is outlined below:
